

Rotary Action Files™

- Reduces filing and retrieval time
- Multi - user access
- Mix media and tiers for custom configurations
- Movable dividers keep files organized
- Heavy - gauge steel construction

Datum Rotary Action Files™ provide you with greater access, creating a more efficient work environment. Each tier of the Rotary Action File™ turns independently, enabling any number of employees instant access to records.

Use less floorspace while achieving easier access! Standard tiers available in sizes ranging from 36" to 54" in diameter and can be stacked up to 7 levels high.

WHY SPECIFY A DATUM ROTARY ACTION FILE

Most filed material is thicker at one edge than the other because of fasteners, staples, paper clips, etc., reducing the amount of capacity in standard filing cabinets, (see figure A).

The Datum Rotary Action File takes advantage of this by compressing the files on the inner circumference and allowing the thicker outer edge of the file to spread comfortably along the outer circumference (see figure B).

This allows for greater storage capacity and faster fingertip access to files. One 54" seven tier Rotary Action File is the equivalent to seven conventional four drawer filing cabinets. Also, because of its unique design multiple tiers can be assembled in one central location, giving accessibility to several people at one time.

A Datum Rotary Action File™ can be used for virtually any type of storage. Applications include; medical, legal, purchasing, customer service departments and microfilm storage.

ADA Compliant with improved accessibility.

Seven conventional four drawer filing cabinets = One 54" seven tier Datum Rotary Action File™

Saves 60% of Your Valuable Floor Space!
